Online platform sololearn

Web Development Workshop

(7 days)
Woocurs Academy

Projects

Personal Portfolio Website

Built a simple portfolio website using React to display projects and basic information.

Fitness Tracker

Developed a Fitness Tracker App using React.js (Web) with Firebase. Implemented user authentication, real-time fitness tracking, and progress dashboards with a clean and responsive UI.

NGO Management System

web SaaS application

Developed a web-based SaaS portal for NGO administrators and managers to manage employees, assign projects, and handle leave management. This was a group project, and my responsibility focused on frontend development of the web application, including UI design and implementation.

Languages

- Tamil
- English
